“Other items on disc” – these are not included on the FSX version disc.

“To install additional liveries from the DVD” – this procedure has been updated and is now covered in the addendum on the inlay (inside front cover of the box)

“3D Cockpit views – The Cabin” – this section mentions the F1View tool available in the “extra” folder on the DVD.

This is not needed for FSX. Users can now take advantage of the new view options which are enabled in FSX. These can be accessed via the menu bar by going to Views > View Mode > Aircraft > Cabin View.

FS2004 users can still download F1View from <http://www.flight1software.com/files/F1View.zip>
